

PRIVACY NOTICE – DIRECT CARE

This practice keeps data on you relating to the following:

- who you are
- where you live
- what you do
- your family or named contact/carers
- your employers
- your habits
- your problems and diagnoses
- the reasons you seek help
- your appointments
- where you are seen and when you are seen who by, referrals to specialists and other healthcare providers, tests carried out here and in other places, investigations and scans, treatments and outcomes of treatments, your treatment history, the observations and opinions of other healthcare workers, within and without the NHS as well as comments and aide memoires reasonably made by healthcare professionals in this practice who are appropriately involved in your health care.

When registering for NHS care, all patients who receive NHS care are registered on a national database, the database is held by NHS Digital, a national organisation which has legal responsibilities to collect NHS.

GPs have always delegated tasks and responsibilities to others that work with them in their surgeries, on average an NHS GP has between 1,500 to 2,500 patients for whom he or she is accountable. It is not possible for the GP to provide hands on personal care for each and every one of those patients in those circumstances, for this reason GPs share your care with others, predominantly within the surgery but occasionally with outside organisations. If your health needs require care from others elsewhere outside this practice we will exchange with them whatever information about you that is necessary for them to provide that care. When you make contact with healthcare providers outside the practice but within the NHS it is usual for them to send us information relating to that encounter. We will retain part or all of those reports. Normally we will receive equivalent reports of contacts you have with non NHS services but this is not always the case.

Your consent to this sharing of data, within the practice and with those others outside the practice is assumed and is allowed by the Law.

Staff who have access to your information will only normally have access to that which they need to fulfil their roles,

You have the right to object to our sharing your data in these circumstances but we have an overriding responsibility to do what is in your best interests. Please see below.
